PROFILE

I'm a junior full-stack developer with a foundation in Ruby on Rails and JavaScript, built through a 9-week intensive bootcamp at Le Wagon. Before that, I explored UX/UI design and tools like Photoshop and Illustrator through courses at CoderHouse, which gave me a strong eye for usability and interface design — a perspective I now bring into my development work. During the bootcamp, I completed three full-stack projects, both individually and in teams, tackling real challenges like authentication, APIs, and deployment. I'm a fast learner with a genuine drive to keep growing as a developer, and I'm now looking for a junior developer role where I can apply what I've built, keep learning, and contribute to a team.

PROJECTS

PetCare AI | [Team Project](#)

Ruby on Rails, JavaScript, Turbo, Stimulus, PostgreSQL, GitHub Models (LLM API)

Full-stack web app for pet owners to manage their pets and get AI-powered veterinary guidance through a chat interface. Led backend development — designed the database models, built the pet management system, and integrated an LLM-powered assistant to handle contextual conversations per pet. Collaborated with teammates on frontend interactivity (Turbo/Stimulus).

Canggu Social Club | [Team Project](#)

Ruby on Rails, JavaScript, Turbo, Stimulus, PostgreSQL, GitHub Models (LLM API)

Community platform for discovering and promoting local events in Canggu, Bali, featuring a short-form video feed for event promotion. Led backend development — built the event creation/management system and implemented AI chatbot logic for personalized event recommendations. Collaborated with teammates on frontend interactivity (Turbo/Stimulus).

RoadReport AI | [Hackathon Project — Solo Full-Stack Lead](#)

Ruby on Rails, JavaScript, Turbo, Stimulus, PostgreSQL, GitHub Models (LLM API)

Real-time platform for community-driven reporting of traffic incidents and road hazards, built solo during a hackathon. Integrated an AI assistant that analyzes submitted reports and generates location-based traffic insights to support route planning. Handled the full stack — from data modeling to AI integration — under hackathon time constraints.

TECHNICAL SKILLS

Languages: Ruby, JavaScript, HTML5, CSS3, SQL

Frameworks & Libraries: Ruby on Rails, Hotwire, Turbo, Stimulus, Devise

Tools & Platforms: PostgreSQL, Git, GitHub, Heroku, GitHub Models (Azure AI)

EDUCATION

AI Software Development Bootcamp | Le Wagon (2026)

Intensive 9-week full-stack web development program covering Ruby on Rails, JavaScript, and AI integration.

UX/UI Design | Coder House (2024)

Photoshop & Illustrator | Coder House (2024)

Foundations of Robotics and IoT | Nexford University (2025)
